

CT Jobportal - Exhaustive End-to-End (E2E) Testing Document

Project: CT Jobportal

Focus: Comprehensive UI Interaction, Button Behaviors, Form Submissions, and E2E Workflows.

1. Public Pages & Authentication

1.1. Navigation & Header

- **Logo Click:** Verify clicking the site logo redirects to the Home page.
- **Navigation Links (Home, Jobs, Blog, Free Assessment):** Verify clicking each link routes to the correct page without page reload (SPA routing).
- **"Login" Button:** Verify it opens the Login modal or page.
- **"Register" Button:** Verify it opens the Registration modal or page.

1.2. Authentication Workflows (Login/Register)

- **Role Selection Tabs:** In Register, click through "Jobseeker", "Company", "College" tabs. Verify fields change accordingly.
- **"Show/Hide Password" Toggle:** Verify clicking the eye icon toggles password visibility.
- **"Forgot Password?" Link:** Verify it routes to the reset password flow.
- **"Submit / Create Account" Button:**
 - *Empty form:* Verify validation errors appear on required fields.
 - *Invalid email:* Verify email format validation triggers.
 - *Valid form:* Verify loading state (spinner), successful creation, toast notification, and redirection.
- **Social Login Buttons (e.g., Google/LinkedIn):** Verify OAuth flow initiation.

1.3. Public Landing & Blog

- **"Start Free Assessment" CTA Button:** Verify it routes to the assessment module.
 - **Blog Accordion Toggles (FAQs):** Verify clicking the '+' or '-' icons expands/collapses the answers smoothly (HTML5 accordion).
 - **"Read More" / Article Links:** Verify routing to individual blog post pages.
 - **Footer Links:** Verify all social media SVG icons and policy links open correctly.
-

2. Jobseeker Portal

2.1. Dashboard & Profile

- **Sidebar Navigation Buttons:** Click through Profile, Applications, Assessments, Mock Interviews, Career Counselling.
- **"Edit Profile" Button:** Opens the profile editing form.
- **"Upload Resume" Button (File Input):** Verify file picker opens, accepts PDF/DOCX, and shows upload progress.
- **"Save Changes" Button (Profile):** Verify data persists, loading state triggers, and success toast appears.
- **"Add Education / Experience" (+ Icon):** Verify dynamic form fields are added to the UI.

2.2. Job Search & Application

- **Search Bar & Filter Checkboxes:** Verify typing in search and clicking filters dynamically updates the job list.
- **"View Details" Button (Job Card):** Verify it opens the full job description.
- **"Apply Now" Button:** Verify it opens the application modal.
- **"Confirm Application" Button (Modal):** Verify application submission, status change to "Applied", and success notification.

2.3. Career Counselling & Assessments

- **"Request Counselling" Button:** Verify form opens.
 - **"Submit Request" Button:** Verify request moves to "Pending" list.
 - **"Edit" Button (Pending Session):** Verify the edit modal opens, pre-filled with data.
 - **"Cancel Request" Button:** Verify confirmation dialog appears, and status updates to "Cancelled" upon confirmation.
 - **"Start Test" Button (Assessments):** Verify timer starts and first question loads.
 - **"Next / Previous" Buttons (Quiz):** Verify navigation between questions.
 - **"Submit Test" Button:** Verify confirmation prompt, submission, and immediate calculation of results.
-

3. Company / Recruiter Portal

3.1. Dashboard & Job Posting

- **"Post a Job" CTA:** Verify it opens the job creation form.
- **Rich Text Editor Toolbar (Job Description):** Test bold, italic, lists, and link buttons inside the description editor.
- **"Publish Job" Button:** Verify validation for missing fields, loading state, and redirection to job list.
- **"Edit / Delete" Icons (Job List):** Verify edit form populates correctly. Verify delete prompts a confirmation modal.
- **"View Applications" Button:** Verify routing to the candidate list for the specific job.

3.2. Applicant Tracking & Interviews

- **Candidate Status Dropdown:** Change status (e.g., Shortlisted, Rejected). Verify database update and UI reflection.
- **"Schedule Interview" Button:** Verify modal opens for date/time selection.
- **"Send Invite" Button (Modal):** Verify API call triggers and success toast appears.

3.3. Subscription & Team Management

- **"Upgrade Plan" Button:** Verify routing to pricing page.

- **"Apply Coupon" Button:** Enter text, click apply. Verify total calculates correctly or shows "Invalid Coupon" error.
 - **"Pay Now" (Razorpay integration):** Verify Razorpay checkout modal opens over the UI.
 - **"Add Team Member" Button:** Verify invite form opens.
 - **"Toggle Active Seat" Switch (isActiveSeat):** Verify clicking the toggle activates/deactivates a user. If active limit is reached, verify error toast prevents the action.
-

4. College / TPO Portal

4.4. Student Management & Bulk Import

- **"Upload CSV" Button:** Verify file explorer opens and accepts .csv files.
- **"Import Students" Button:** Verify progress bar or loading state during parsing. Verify success/error table renders post-import.
- **"Download Template" Button:** Verify a dummy CSV file downloads instantly.
- **Bulk Select Checkbox (Table Header):** Verify clicking it selects all rows on the page.
- **"Update Status" Bulk Action Button:** Verify bulk update modal opens and applies changes to selected students.

4.2. Drive Management & Reports

- **"Create Placement Drive" Button:** Verify form opens.
- **Search Bar (Manage Drive):** Type student name/roll number. Verify the table filters results seamlessly (debounce logic).
- **"Generate Report" Button:** Verify loading state and subsequent trigger of file download (PDF/Excel) for placement statistics.

4.3. Principal Passkey Dashboard

- **"Login with Passkey" Button:** Verify secure read-only access.
 - **Data Export Buttons (Dashboard):** Test export buttons for charts and metrics (if applicable).
-

5. Admin Dashboard

5.1. Global Controls

- **"Approve / Reject" Buttons (Pending Colleges/Companies):** Verify clicking triggers confirmation, updates status, and removes item from pending queue.
- **"Refund" Button (Cancelled Counselling):** Verify refund processing logic triggers.
- **Pagination Buttons (Next, Prev, Page Numbers):** Click through tables. Verify data loads correctly for each page.
- **Theme Toggle (Light/Dark Mode):** Verify instantaneous UI switch across all components.

6. General Interaction Guidelines

- **Button States:** Every button must have a visual `Hover` state and an `Active/Pressed` state.
- **Loading States:** Buttons triggering API calls must show a loading spinner and disable further clicks to prevent duplicate submissions.
- **Modals/Dialogs:** Clicking outside the modal area or pressing the "Escape" key should close the modal.
- **Toasts/Snackbars:** Success or error notifications should appear for 3-5 seconds and have a clickable "X" to dismiss early.
